

CARUS 122

A STEP INTO THE WORLD OF THE 122 SAUTER SOUND

The Carus 122 captivates with its larger soundboard, rich and well-balanced tone, and precise touch – as always, 100% Made in Germany.

DYNAMIC SOUND WITH A CLEAN DESIGN

This is how the Carus 122 presents itself: its soundboard, featuring the unique „SAUTER spherical concavity®“, is almost a quarter larger than that of the Carus 114. As a result, the instrument delivers a full, well-balanced tone with radiant vitality that extends from the bass through to the treble. The larger action of the 122 model, with its optimized leverage, enables an even more precise and nuanced touch.

FORMIDABLE DETAILS

The Carus 122 features a soundboard made of select-grade mountain spruce and offers you the advantages of the unique soundboard enhanced with the „SAUTER spherical concavity®“. It is also equipped with casters and a practice (moderator) pedal.
